Form PCT/ISA/210 (second sheet) (July 1998)

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US05/28819

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)				
This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1. Claim Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2. Claim Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:				
Claim Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)				
This International Searching Authority found multiple inventions in this international application, as follows: Please See Continuation Sheet				
1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.				
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.				
As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:				
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:				
Remark on Protest				
No protest accompanied the payment of additional search fees.

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING					
This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.					
concept under PC1 Rule 13.1. In order for all inventions to be examined, the app	propriate additional examination rees must be pare.				
Group I, claim(s) 1-7, drawn to a method of manufacturing a tubular member.					
Group II, claim(s) 8-23, drawn to a method of manufacturing an expandable tubul	ar member.				
	La DCT Pala 12 1 bassas mades DCT				
The inventions listed as Groups I and II do not relate to a single general inventive Rule 13.2, they lack the same or corresponding special technical features for the f	concept under PC1 Rule 13.1 because, under PC1				
claims of Group I is the intermediate characteristics of the tubular member when i	it is positioned within a preexisting structure where it				
is processed into its final characteristics. The special technical feature of the claim	as of Group II is the quenching of the tubular member				
after heat treating so that the tubular member comprises a microstructure comprisi	ing a hard phase and a soft phase. The inventions of				
Groups I and II lack unity because they depend on different technical features.
